

K-love gives me freedom of religion any where i need it to fulfill my heart with the lord.

i could not imagine having K-Love replaced by another local station filled with garbage and commercial filled radio.K-love provides a break from the commercials on our radios.it also provides teaching on how to treat each other and a variety of other things. Things people do not get on their own without some type of teaching. which is not taught in schools or by the busy parents of today. K-love provides a great contemporary christianity that allows people to come to jesus in their own comfortable way. no local station could provide what K-love can, since they have national resources working together. there is little resources for christianity in this world. to have a good station with everything you need it has to pull from all available resources. a local station would not have the resources or man power to do this. nor would it want to since it would have limited listeners. K-love has the ability to reach everyone which makes them strive to be the best. a local station would not have that desire. it would lower quality across the board in every station type.
